December 30, 2009

Tom,

You may use me as a reference for the security related services that BPS provides Salt River Project. As you know, SRP is part of the Critical Infrastructure in the United States as a major electric and water utility in Arizona. As such, SRP has high-level security needs in certain areas, which include providing high-caliber operators for: threat and vulnerability assessments, penetration audits, quick reaction site security, and VIP protection details.

BPS has been an expert partner with SRP on security matters whenever we have needed support. Much of the work requested of you is unscheduled or with minimal advance notice and your company has always been responsive. I am also very impressed with the level of on-going training your personnel receive.

I am unaware of any other company in Arizona that can provide these services, and certainly none that can to the degree and level of professionalism achieved by BPS. I look forward to continuing the relationship with BPS in order for SRP to meet our future security needs.

Regards,

A handwritten signature in blue ink that reads "Jeremy P. Sturgeon". The signature is fluid and cursive, with the first name being the most prominent.
